30-SECOND EXECUTIVE READ

Profit Is Concentrated. Attention Can Be Focused.

€286.4K net profit across 1,894 products. A small value engine supports the result, while losses concentrate elsewhere. 606 products need an action or classification review. The first management wave covers 401 cases.

THE PORTFOLIO SIGNAL IN FOUR NUMBERS

IMMEDIATE MANAGEMENT FOCUS

Direct first-wave review effort to 401 cases with concentrated upside and loss exposure.

Historical case-study results. The value engine overlaps other groups. Its 150 products are not added to the 401 cases.

Executive Report

Portfolio Economics & Actions

PORTFOLIO ECONOMICS

Positive Net Profit Masks Uneven Economics.

83.9% of net profit comes from the top 10% of products. The remaining 90% contribute 16.1%.

SHARE OF TOTAL PORTFOLIO NET PROFIT

Portfolio snapshot	Value
Products	1,894
Net profit	€286.4K

–€67.8K

Net contribution of loss-oriented roles

Combined result of Stable Loss and Loss Tail

410

Products in loss-oriented roles

384 Stable Loss + 26 Loss Tail

26.1%

Products losing money on >30% of orders

A recurring loss-frequency signal

“Loss-oriented” describes an analytical role. Group net contribution differs from the €77.1K total loss of net-negative products.

DECISION SYSTEM

Seven Roles, Four Checks, One Intervention.

Segmentation proposes. Governance refines. One intervention per product.

Traceable for every product: KPIs, role, governance signals, escalation and final intervention.

SEVEN ECONOMIC ROLES

Seven Roles Turn Economics into Action

Four peer groups describe the main portfolio. Three separate groups keep extreme cases visible.

Role	Products	Net profit	Starting action
Stable Profit	1,246	+€135.5K	Protect
High-Impact Profit	123	+€115.9K	Optimize
Risk-Oriented Profit	69	+€0.5K	Contain
Stable Loss	384	-€27.2K	Correct
Extreme Impact Tail	27	+€101.5K	Optimize
Extreme Volatility Tail	19	+€0.7K	Contain
Loss Tail	26	-€40.5K	Correct
TOTAL	1,894	+€286.4K	One role per product

4 PEER GROUPS

1,822 products (96.2%) with comparable economics

3 EXTREME GROUPS

72 products (3.8%) with exceptional impact or risk

Value engine: 123 + 27 = 150 products. Roles are analytical. Governance tests whether the starting action still fits.

Portfolio Decision Intelligence

Portfolio Economics & Actions

GOVERNANCE SCORECARD

32% of Products Carry 87% of Realised Loss.

Four mutually exclusive states show where the proposed action remains valid and where it needs intervention.

Structural Ambiguity: 2.1% of products, 1.4% of net profit and 3.9% of realised loss.

HARD EXPOSURE = ACTION MISMATCH + STRUCTURAL AMBIGUITY

606 products · 87.0% of realised loss

These products also carry 41.8% of net profit. Review the proposed route before taking commercial action.

Realised loss: absolute total profit of net-negative products (€77.1K). Action Mismatch concerns the model's proposed route.

PRIORITY QUEUES

401 Products Form the First Three Decision Queues.

The first three queues contain 401 cases for immediate management review. Overall, 953 products are active priorities. The remaining 941 stay under routine governance.

FIRST WAVE: FIRST THREE ROWS

401 first-wave cases · 953 active total

Queue	Products	Net profit / share	Loss %	Why it is here	Management response
Misaligned Upside	80	€89.1K / 31.1%	0.0%	Outperforms peers, escalated, passes reliability checks	Validate before expansion
Fragile Value	163	€20.0K / 7.0%	6.3%	Outperforms peers, escalated, fails a reliability check	Stabilise before scaling
Broken Value	158	-€22.6K / -7.9%	66.2%	Underperforms peers and needs action / role review	Correct · Restructure Review exit
Defendable Value	234	€57.2K / 20.0%	2.8%	Outperforms peers with no governance escalation	Protect / maintain
Watchlist / Unresolved	318	€15.6K / 5.4%	5.0%	Underperforms peers, but route remains acceptable	Diagnose / monitor

Shares use €286.4K net profit and €77.1K realised loss. Peer performance compares each product with its own analytical role.

ACTION PLAN

Three Sprints: Validate, Correct, Stabilise.

Each queue needs a different evidence package and a documented decision. Finance and Commercial lead the pilot.

1 VALIDATE 80

EVIDENCE

Confirm demand, margin durability and concentration dependency.

DECISION

Retain or reclassify the route.
Approve expansion only after validation.

Evidence-backed opportunity decision

2 CORRECT 158

EVIDENCE

Review pricing, discounts and cost drivers with the commercial owner.

DECISION

Approve a correction or restructuring.
Review exit when recovery is unviable.

Corrective action with an owner

3 STABILISE 163

EVIDENCE

Locate the sources of profit variation and repeated loss-making orders.

DECISION

Set volatility and loss-rate guardrails.
Require evidence before scaling.

Guardrails and a review date

PROPOSED WEEKLY DECISION CADENCE

MONDAY

Assign owners and evidence needs

Finance + Commercial lead

WEDNESDAY

Review evidence and recommendation

Finance + Commercial challenge

FRIDAY

Approve and record the decision

Named owner + authorised approver

Week 1: confirm data, capacity and owners. Weeks 2–3: review and implement approved actions. Week 4: evaluate the pilot.

Executive decision brief — Slide 7 / 8

Portfolio Economics & Actions

DECISION REQUESTED

Approve a Four-Week Portfolio-Control Pilot.

Approve a defined review scope, accountable owners and success gates. Confirm delivery capacity before launch.

FOUR WEEKS · 401 PRIORITY CASES

Owners	Finance + Commercial
Scope	Validate 80 · Correct 158 · Stabilise 163
Resources	Existing analyst time. No new headcount requested.
Launch gate	Confirm hours, capacity and effort cost.
Protection	Safeguard the 150-product value engine.
Authority	New spend and product exits need explicit approval.

PROPOSED SUCCESS GATES

DECISIONS COMPLETED

≥80% of 401 cases: at least 321 documented decisions.
Record an owner, rationale and approved next step.

ECONOMIC MOVEMENT

Lower realised loss with profit stable or higher.
Compare equivalent periods and disclose volume / mix changes.

BROKEN VALUE RESOLUTION

≥30% of 158 cases: at least 48 resolved or exited.
Count evidence of resolution, not a label change alone.

Audit trail: KPIs, role, signals, escalation and intervention. Add owner, approved decision and review date.

Week 4 reviews decisions and available economic evidence. Financial effects may need a longer observation window.

Approve the 401-case pilot. Protect the 150-product value engine. Report back at week 4.
